Contract Information:

Electricity Source	UK Grid Mix
Contract Type	Fixed
MOP	Siemens
DC/DA	SSIL

Your contract will automatically expire on the contract end date shown above. After this date, out of contract rates will apply until you agree another supply contract with Hartree Partners Supply or transfer to another supplier. These Out of Contract rates are variable and typically higher than our fixed contract rates. We will reach out to you before the end of your contract, but it is your responsibility to renew the supply contract before the end date.

Some More Details on your Invoice:

DUoS Capacity Charge: This is a charge for the capacity reserved for your site on the local electricity distribution network. It ensures the network is maintained and capable of meeting your agreed capacity needs.

TCR TDR (Targeted Charging Review Transmission Demand Residual): This charge is part of a regulatory reform to ensure the fair allocation of fixed transmission network costs. It is applied to your electricity usage based on your consumption patterns.

Standing Charge: This is a fixed daily or monthly fee that covers the cost of maintaining the infrastructure that supplies electricity to your site, as well as administrative costs, regardless of how much energy you use.

CCL (Climate Change Levy): This is a government tax designed to encourage you to improve energy efficiency and reduce carbon emissions. It is applied to the energy you consume unless you qualify for an exemption.

CCL (Discount): If you meet specific criteria or participate in energy-saving schemes like a Climate Change Agreement (CCA), you may receive a discount on the Climate Change Levy.

*This invoice had to be billed using estimated consumption.
When actual consumption data is available, we will reconcile any delta.

**This number is an estimate and is subject to revision
